---------------------------------------	---

ROLE IN THE PROJECT

POTENTIAL ROLE IN THE PROJECT:

CETIC is a research centre in Belgium doing research in the field of software and security engineering. We have expertise in DevSecOps, compliance, risk, pentesting, AI, awareness and cybersecurity in general. We have research activities in automating compliance processes, AI-based generation of penetration tests, AI-based tools for risk analyses, securing low-code applications, security testing of cyber-physical testing and industrial installations (with a custom platform called PRACTIS), federated learning and homomorphic encryption, RAG-based chatbots, ML engineering, combinatorial optimization, IOT security, assurance case generation. We have experience with cybersecurity standards in various fields (industry and IEC62443, railway, medical devices, automotive...)
